New Products Introduction

INTRODUCTION

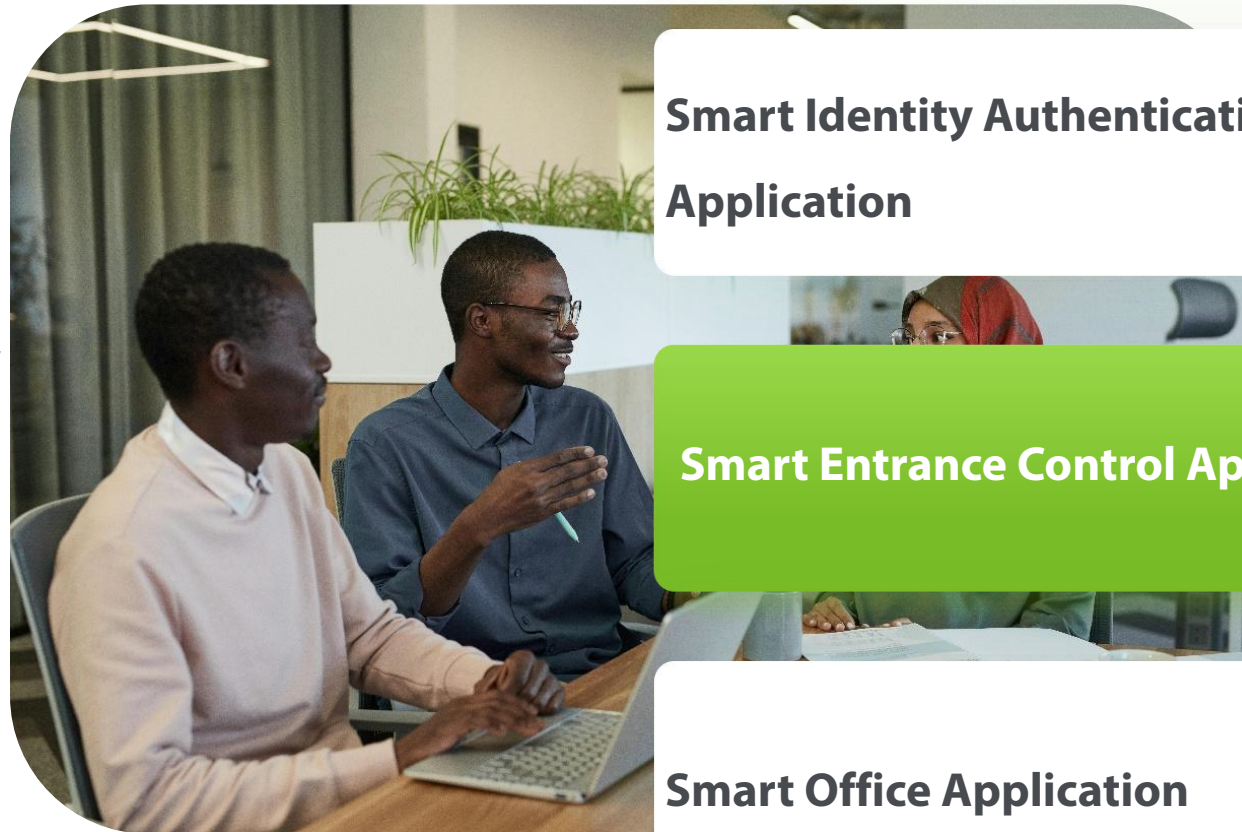

Introduction

ZKTeco at a Glance

ZKTeco offers services on all fronts to public-service, enterprise-level and personal users.

ZKTeco dedicates itself in the three industries including:

**Smart Identity Authentication
Application**

Smart Entrance Control Application

Smart Office Application

Core Biometric Technology

ZKTeco

Time Attendance & Access Control Products

ZKTeco is a globally renowned enterprise with biometric authentication as its core techniques, which dedicates itself in **Smart Identity, Smart Entrance Control and Smart Office Application**

Time Attendance

Obtain the attendance record of groups and individuals in a specific place and within a specific time period in some way

Access Control

manage who can access which doors (where) at what time (when) by which verify type (how), and provide afterwards query record(record can use for time attendance)

SenseFace Series

SIP-Ready Multi-Biometric Access Control Terminal
with Video Intercom Capability

Facial
Authentication

ZKBio CVAccess

Compatible with
ZKBio Zlink

SenseFace 7A

SenseFace 7B

SenseFace 4A

SenseFace 3A

SenseFace 2A

1

Multi-Functional Access Control

Supports facial, fingerprint and card authentication, but also has a video intercom function via SIP protocol (Version 2.0) (Support **Enhanced Video Intercom experience**) and supports ONVIF protocol.

2

Advanced Biometric Technology

SenseFace Series uses the latest intelligent engineering facial authentication, in-glass fingerprint authentication or ZK optical fingerprint verification technology, offering secure biometric authentication to defense against fake photos and video attacks.

3

Hardware Selection

CPU: Dual Core@1GHz
RAM: 512MB; ROM: 8GB
Platform: ZAM70 (New)
Biometric Algorithm: ZKFace V4.0 / ZKFingerprint V13.0 or V10.0
Conversion

4

Flexible communication protocols support

Multiple communication methods: TCP/IP, Wi-Fi, USB, *Wiegand/RS-485(★)* and provides protocol conversion, for example, switch from AC Push to TA Push, to meet different needs of network environments.

Note: Features and parameters with ★ are not available in all devices.

Simple Access Control Functions

Electric Lock; Door Sensor; Exit Button.
12V 1.5A Power.

Biometric Modes

Visible Light Facial Authentication Technology
and ZK Optical Fingerprint Verification.

Operating Temperature and Humidity

-5° C to 45° C;
20% to 80% RH (Non-condensing).

User Data Synchronization

User data can be downloaded / uploaded via
USB drive from one device to other one.

* USB driver to download data and please
make sure to use FAT32 format.

SenseFace 3 / 4 / 7 overall character

Protection Rating

Attained IP65 Protection Rating With Dustproof and Waterproof.

Advanced Access Control Functions

Wiegand input or output shared; RS485 communication; Electric Lock; Door Sensor; Exit Button. 12V 3A Power.

Operating Temperature and Humidity

-5° C to 45° C;
10% to 90% RH (Non-condensing).

Biometric Modes

Visible Light Facial Authentication Technology and In-glass fingerprint technology. (Despite the lack of adequate lighting, it can perform visible light facial authentication without supplement light.)

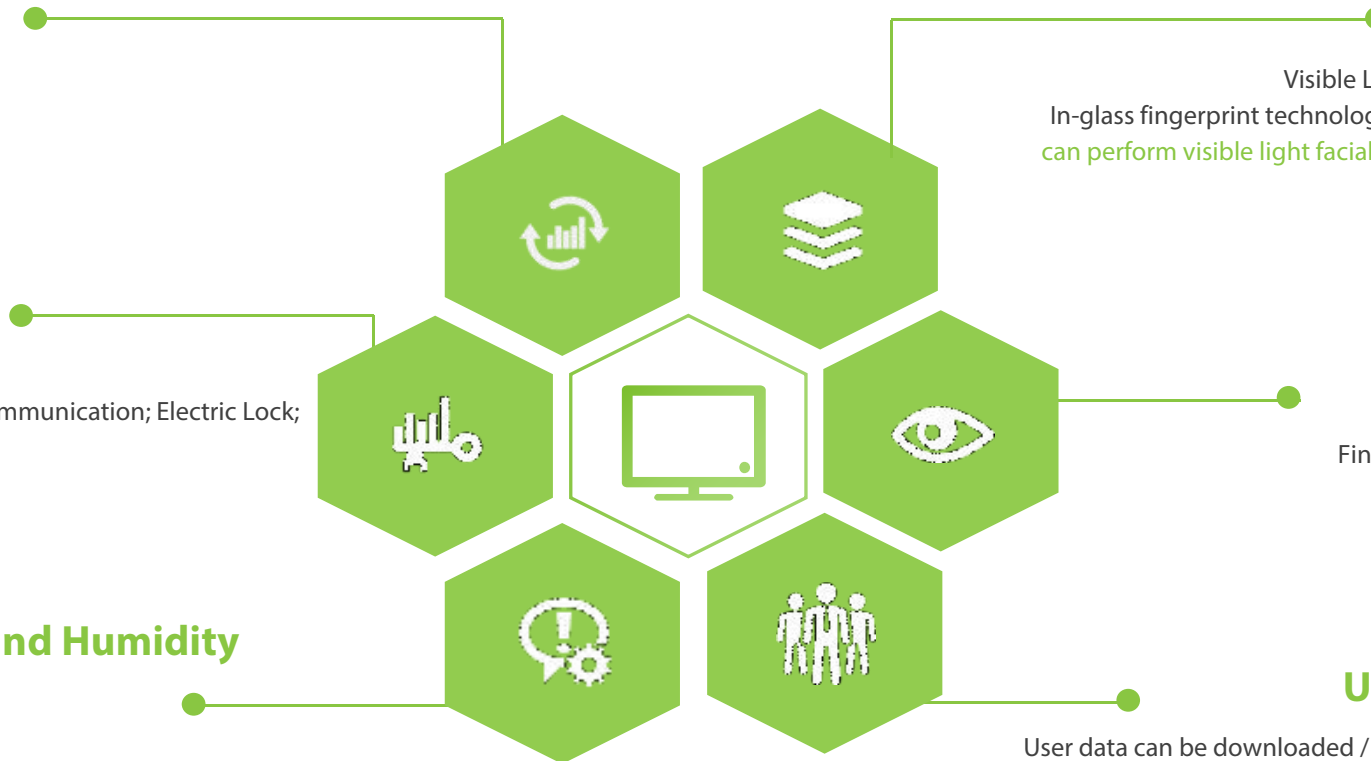

Form-Fitting design

Fingerprint sensor fit with touch screen panel.

User Data Synchronization

User data can be downloaded / uploaded via USB drive from one device to other one.

* Download data using the USB driver and make sure to use the FAT32 format.

Special Technical Functions - Video Intercom & ONVIF

ZKTeco

Setting in menu: Tap **【SIP Settings】** or **【ONVIF Settings】** on the **【Video intercom】** Parameters interface to go to the corresponding setting.

* Set the device to the same network segment as the Indoor Monitor.

≡ Special Technical Functions - Wireless Doorbell

ZKTeco

SenseFace 2A

SenseFace 3

SenseFace 4

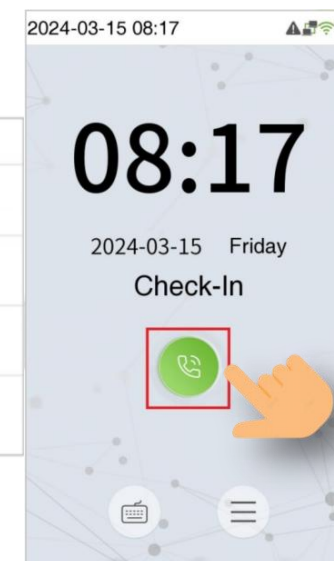

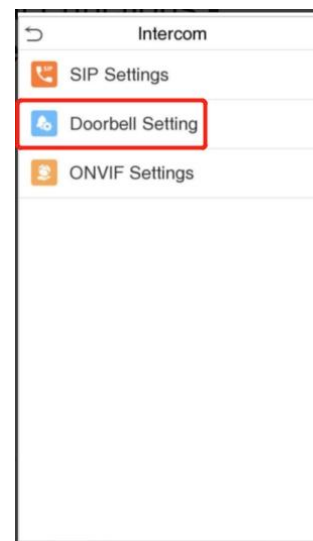

SenseFace 7

Wireless Doorbell

Setting in menu:

Tap Doorbell Setting on the Video intercom Parameters interface to go to the monitoring doorbell setting.

Specifications

Model	F35
Display	2.4"@ TFT Color LCD Screen (720*1280)
Authentication method	Fingerprint / Card / Password (Physical Touch Keypad)
User Capacity	10,000 (1:N)
Card Capacity	10,000 (1:N)
Fingerprint Template Capacity	10,000 (1:N)
Transaction Capacity	500,000
Communication	TCP/IP*1 Wi-Fi (IEEE802.11a/g/n) @ 2.4 GHz Wiegand (Input & Output)*1 RS485: ZKTeco RS485 *1
Standard Functions	Webserver, ADMS, DST, Photo Capture, Event Photo Capture, Up to 14-digit User ID, Access Levels, Groups, Holidays, Anti Passback, Record Query, Tamper Switch Alarm, Multiple Verification Methods Video Door Phone , ONVIF (Compatible with Profile S, Profile T, Profile G, Profile C, Profile Q & Profile A), AC Push and TA Push, Protocol Switch, HTTPS / SSH Backend Access, T9 Keyboard (Input)
Optional Functions	ZSmart, SIP Client(Ver2.0), Wi-Fi, IC Card, Multi-Tech Module
Ingress Protection Rating	IP65 (waterproof and dustproof) IK04 (Vandal Resistant)
Certifications	ISO14001, ISO9001, CE, FCC, RoHS

Installation Environment

ZKTeco

Indoor

**Semi-outdoor or outdoor light rain
IP65 waterproof and dustproof**

During heavy rain seasons,
we recommend to use device with IP66
protection rating.

Video Intercom
(SIP)

Compatible with

 **ZKBio** CVSecurity

SpeedPalm-V5L

Product Introduction

SpeedPalm-V5L

- ❖ Screen: 5"@ TFT Color Touch LED Screen (272*480)
- ❖ Visible Light **Facial & Palm Recognition**
- ❖ Better hygiene with touchless biometric authentication
- ❖ Anti-spoofing algorithm against print attack (laser, color and B/W photos), videos attack and 3D mask attack
- ❖ Available card modules: 125KHz EM card(Standard) or 13.56MHz IC card(Optional)
- ❖ New palm module adapts to a variety of lighting conditions, and is equipped with multi-color LED lights to assist in palm positioning to enhance the user experience
- ❖ HD Video Door Phone Via SIP Protocol. Compatible with ZKTeco SIP Video Intercom Indoor Monitor, ZKBioCV Security APP and ZSmart APP (Optional)
- ❖ Capacity: **Palm Capacity: 5,000; Face Capacity: 10,000; RFID Capacity: 10,000; Transactions:200,000**

Product Highlights

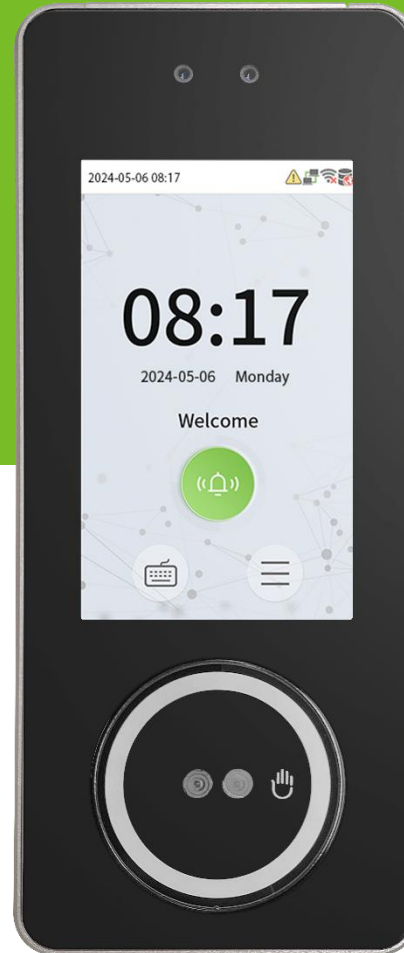

Dual-Modal Palm Algorithm

Combining palm print and vein recognition, the dual-modal algorithm greatly improves identification accuracy and security..

Strong Light Resistance

Through WDR image processing technology and global flash imaging, it can quickly capture palm prints and palm veins under strong light and in various environments. It operates effectively in lighting conditions ranging from 0.01 Lux to 50,000 Lux, even under direct sunlight.

Anti-Counterfeiting

It has strong anti-counterfeiting features, preventing spoofing with photos or videos, ensuring security in various applications

Fast Recognition

The algorithm is trained to handle different palm angles and postures, enabling recognition in milliseconds as you casually raise your hand.

System Configuration

ZKTeco

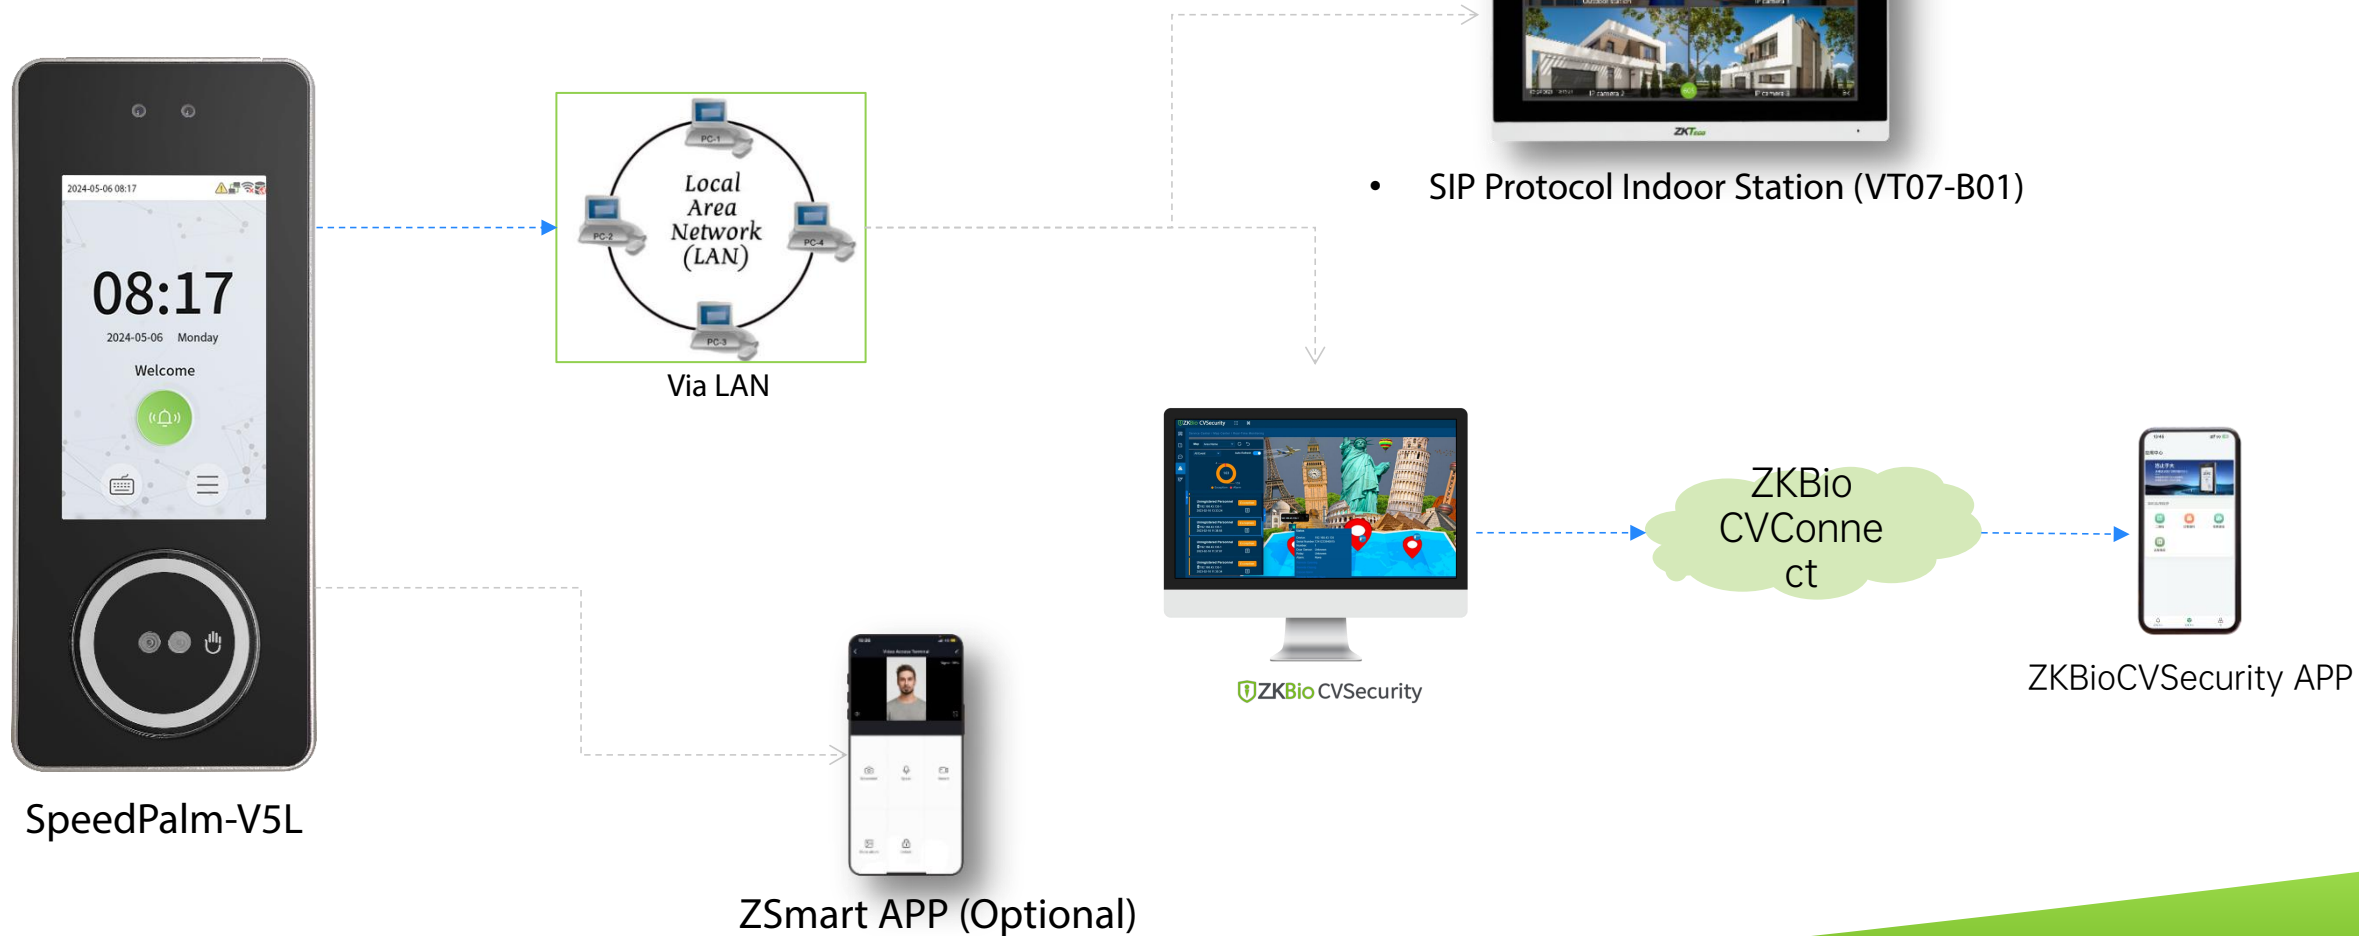

Special Functions-Video Intercom

Video Intercom

Deliver more for secure and intelligent services.

* ZSmart and SIP intercom function is alternative.

Verification successful

Palm too close

Standby state

Validation failed

Q1 What are the advantages of the SpeedPalm-V5L?

- Supports high-accuracy visible face and palm authentication for contactless access;
- Cooperate with anti-counterfeiting algorithms to improve security;
- The new palm module adapts to a variety of lighting conditions and is equipped with auxiliary palm positioning to enhance the user experience.
- Multiple video intercom functions to meet the needs of different scenarios
- Strong Light Resistance

Q2 How does the video intercom function of the SpeedPalm-V5L work?

The video intercom function of SpeedPalm-V5L can be realized in two mode, one is indoor station, another is APP.

Indoor station, work with ZKTeco VT07-B01 or 3rd brand indoor station via SIP protocol.

APP 1: ZKBio CVSecurity APP, Device should connect to ZKBio CVSecurity (via SIP protocol) and Cloud SIP server.

APP 2: ZSmart APP via Tuya cloud. (optional) * ZSmart and SIP intercom function is alternative.

Q3 How fast is the palm authentication of the SpeedPalm-V5L?

The SpeedPalm-V5L is designed for fast authentication. Its high-accuracy palm recognition takes only 0.35 sec per session and can be compared with up to 5,000 palm templates.

Q4 Do different palm authentication algorithms have compatibility issues?

Various platforms are not compatible with the palm authentication algorithms they utilize.

Q5 Are there any palm readers currently available ?

Not yet, but we plan to using the Palm Raeder AMT-PVS-50, information about the product can be found on the website: <https://armatura.us/#p2>

Horus E2

Android-based Biometric Terminal for

Horus E2-FP

Horus E2-B

Product Features

ZKT*TECO*

1

Multi-Functional Access Control

Supports facial, fingerprint,RFID and QR code recognition, and PIN entry, catering to a wide range of security requirements.

2

Advanced Biometric Technology

SenseFace Series uses the latest intelligent engineering facial authentication, ZK optical fingerprint verification technology, offering secure biometric authentication to defense against fake photos and video attacks.

3

High Scalability

Support android LCDP development platform for the 3rd-party application integration.

4

Flexible communication protocols

Multiple communication methods: **4G**, TCP/IP, Wi-Fi, USB, Wiegand/ RS-485 and provides protocol conversion, for example, switch from TA Push to AC Push, to meet different needs of network environments.

Product Overview

Horus E2 Series

Horus E2

Access Control Interface	optional with DM10	Wiegand, RS485, Lock, Alarm, Auxiliary input, Sensor, Exit Button

VS

Specification

Q1

Is Horus E2 device possible to connect to time attendance software?

Ans: Yes. Device supports multiple communication protocol convert, its firmware has AC push and can convert to TA push, so that it is compatible with different AC or TA software.

Q2

Compared to Horus E1, what have been upgraded?

Ans: On the hardware 1) the system has been upgraded; 2) access control terminals have been added, so users no longer need to connect DM10 to control the lock; 3) backup batteries have been added as an optional at the bottom. 4) add dual frequency card module as standard;

On the firmware: it is an integrated attendance and access control firmware that supports switching firmware modes.

Q3

Is Horus E2 support Android LCDP(edk)?

Ans: Yes. Device supports android EDK for 3rd-party android integration.

Product C3 Pro Plus

C3-100 Pro Plus

C3-200 Pro Plus

C3-400 Pro Plus

The new generation **Entry-level** RFID Control Panel

- Multiple Authentications: RFID/ Password/ QR Code
- Cost-effective
- Stable and reliable

Features

- Access points capacity: 1 / 2 / 4 Access Points.
- Multiple Authentication Methods: RFID Cards / Dynamic QR Code / Password.
- Optimal Capacity for small to medium enterprise. Supports 100,000 QR Code capacity and 100,000 RFID card capacity.
- Features ZKTeco's RS-485 protocols and OSDP (Ver 2.1.7) for connecting card readers, and it is compatible with ZKTeco's QR code readers such as QR50, QR500, and QR600.
- Highly versatile with Wiegand interfaces (Input) for integrating with third party card reader equipped with Wiegand interface (Wiegand format W24/W34/W66).
- Supports the I / O expansion board, EX0808 with 8 inputs and 8 outputs (via RS-485 connection).
- Supports firmware protocol access control push and compatible with ZKBio CVAccess.

Product-InBio Pro Plus

InBio160 Pro Plus

InBio260 Pro Plus

InBio460 Pro Plus

Professional Biometric Control Panel

- **Visible light Face/Fingerprint/RFID/Password/QR code**
- **Cost-effective**
- **Stable and reliable**

Features

Embrace Multi Biometrics Authentication

InBio Pro Plus Series is equipped with embedded facial, fingerprint and card authentication. With RS-485 interfaces, InBio Pro Plus Series is compatible with the ZKTeco's KF1100 Pro/ KF1200 Pro (face reader) and FR1200/ FR1500S (fingerprint reader). It allow swiftly transmit face or fingerprint templates to the InBio Pro Plus via RS-485

Communication

InBio Pro Plus controllers can be installed easily on your network and support HTTP / HTTPS communication. Web server allows setting and modification of network parameters directly and easily.

Elevated Capacity and Data Security

Support a maximum of 3,000 face template ,up to 20,000 fingerprint templates, up to 100,000 card users and a maximum of 100,000 Dynamic QR code capacity . By employing the AES 256-bit algorithm for data encryption, the system safeguards against data loss in the event of a power outage or interrupted network connection.

Reduce Maintenance Cost

The InBio Pro Plus Series allows for remote online firmware updates by ZKBio CVSecurity, facilitating seamless updates not only for the controller but also for the slave RS-485 readers, thereby reducing maintenance expenses.

Seamless RFID Authentication Integration

With an RS-485 and Wiegand input reader interface, the InBio Pro Plus Series effortlessly connects with ZKTeco's RS-485/ OSDP (Ver 2.1.7) card readers and supports Wiegand reader formats (W26/ W34 / W66).

Expanded Control and Interface Capabilities

After programming, auxiliary relays can be configured to operate lighting systems, alarm units, and intrusion detection panels. These relays can also interface with supplementary locking mechanisms and gate controllers, enhancing overall security and automation.

Three unique InBio Pro Plus Models Available

InBio Pro Plus series comprises three models to suit various project needs. InBio Pro Plus consists of 1-door, 2-door, and 4-door models, that can be mixed and matched in an optimized system architecture and to reduce the cost of unused capacity. architecture.

Advance Access Control Functions

Equipped with a suite of standard access control functions including a built-in web server, support for up to 14-digit User IDs, customizable access levels and groups, holiday scheduling, anti-passback, anti-tailgating measures, linkage capabilities, global linkage settings, support for multiple verification methods, and the ability to integrate up to eight expansion boards.

Enhanced Security with Dynamic QR Cod

Utilizing an RS-485 QR reader and ZKBio CVSecurity app, the InBio Pro Plus Series offers Dynamic QR codes and integrates with the visitor module, allowing visitors to access authorization by simply opening an HTML page on their smartphone.
